PROFESSIONAL SUMMARY

A passionate and dedicated **Full Stack Web Developer** with hands-on experience in developing dynamic web applications and machine learning projects. Skilled in Python, React.js, PHP, and modern database systems. Enthusiastic about creating intelligent systems like e-commerce platforms and NLP-based solutions for real-world problems.

PROJECTS

E-Commerce Website Development *Full Stack Project*

Developed a complete e-commerce web application featuring product listings, cart management, and secure checkout using HTML, CSS, React.js, PHP, and MySQL.

Email Spam Detection using Machine Learning *Machine Learning Project*

Implemented a model to classify emails as spam or not using Python, Scikit-learn, NLP techniques, and labeled datasets.

WhatsApp Text Analyzer *Data Analysis Project*

Built a text analysis application using Python, Pandas, NLTK, and NLP techniques to visualize user activity, message patterns, and sentiment insights from exported chat data.

EDUCATION

Kalpataru Institute of Technology

Bachelor of Engineering

CGPA: 7.5

TECHNICAL SKILLS

Programming Languages:	Python, C, Java, JavaScript
Web Technologies:	HTML5, CSS3, React.js, PHP
Database Systems:	MongoDB, MySQL
DevOps & Tools:	Git, GitHub, XAMPP, Docker

CERTIFICATIONS

- Participation Certificate – National Level Hackathon, Bengaluru
- Certificate of HTML Introduction – Career Ninja
- Encoder and Decoder Certificate – Simplilearn

ADDITIONAL INFORMATION

Languages Known: English (Fluent), Kannada (Conversational)
